September option. CLOSING PRICES OF PHILADELPHIA STOCKS

CLOSING, PRICES OF CHICAGO STOCKS. Tesjerday, To-day Chicago, July 14, 1897.

Diamond Match, 145 — Lake St Elev. 14, 1324, 13 Wednesday, July 14-p. m.

Stock market values advanced again to-day, and, outside of Sugar Refining, a further expansion in the volume of business took place, with increased activity in the low-priced shares, while in the bond department a considerable gain over yesterday's total business was recorded. Sugar Refining on a smaller volume of business went through one of its characteristic movements, and again attracted a large share of the speculative attention, dealings elsewhere, however, showing an increase in commissionhouse buying, and more pronounced outside buying since the recent heavy movement in stocks culminated a fortnight ago. In Sugar Refining a weak opening was followed by a break to 1321/2, against the closing at 136 last night, and after a rally to 135% it moved irregularly, with its final price at 134%, or a net loss of 1% per cent. Heavy sales for profits were doubtless made in the stock at the opening, but the chief selling in it appeared to be due to what was considered more unfavorable reports from Washington regarding the possible treatment of the sugar schedule by the conference committee. From a speculative point of view a reaction in the stock was due, and the course of the stock in the day's market was a natural sequence of its rapid advance in the last two days. It is currently reported in the Street that large amounts of Sugar Refining have recently been taken by investment interests, and that Standard Oil interests have been heavy buyers on investment; but the theory that the stock has been removed from the influence of manipulation seems rather far fetched, in view of the movement in it in the last few days. It is doubtless a good security to hold as a dividend payer, but it is still very much in evidence as a speculative issue, if sales of 204,031 shares in three days can be taken as

a criterion.

The upward movement in to-day's security market embraced a large number of issues, in fact, nearly all of the active list, some stocks making substantial net gains, as in Susquehanna and Western common and preferred, Cleveland, Cincinnati, Chicago and St. Louis, and to a less extent in the Granger shares, Reading, American Tobacco, Chicago and Great Western, Minneapolis and Sa. Louis, Oregon Short Line, and St. Louis and San Francisco first preferred. In stocks less actively traded in, East River Gas and Consolidated Gas were strong features. The Granger shares were helped by additional good crop news, St. Paul making a new record for the year by selling up to S5%. The market closed strong and active. The foreign exchange market remained firm at yesterday's advance, but the business transacted was on a light volume and no good orders appeared in the market. While there may be scattering shipments this month, the movement is practicall, at an end, and the next feature of the market is likely to be imports of the precious metal. Money rates continue easy, and the demand in connection with crop movement purposes has not yet begun. The low rates prevailing for money are no inconsiderable factors in the current buying movement in low rate bonds.
